SCENE B

INT. LAB - ANOTHER DAY (DAY 2)  
(Leonard, Lisa)

LISA ■, 20'S, CUTE BUT GEEKY, IS WORKING BEHIND SOME LASER APPARATUS, WEARING GOGGLES. SHE'S DOING SOMETHING COOL WITH SHINY LIGHTS. LEONARD WALKS UP TO HER.

SCRIPT

LEONARD

Hello, Lisa.

LISA

Hi, Leonard.

LEONARD

Lisa, I would like to propose an experiment.

LISA

Not now. I'm trying to see how long it takes a five-hundred kilowatt oxygen iodine laser to heat up my Cup a' Noodles. \*

LEONARD

I've done it. It's about two seconds. \*

Anyway, I was thinking more of a bio-social exploration with a neuro-chemical overlay. \*

LISA

Wait... are you asking me out?

LEONARD

I was going to characterize it as the modification of our colleague-slash-friendship paradigm with the addition of a date-like component, but we don't have to quibble over terminology.

LISA

That seems like an intriguing area of inquiry. What sort of experiment do you propose?

LEONARD

I would assume we would follow the generally accepted pattern in this area. I would pick you up and take you to a restaurant for a meal. Then after dinner we would see a movie, probably a romantic comedy featuring either Hugh Grant or Sandra Bullock.

LISA

Interesting. Would you agree that the primary way we will evaluate the success or failure of the date would be the biochemical reaction during the goodnight kiss?

\*

\*

7/8

LEONARD

Heart rate, pheromones, et cetera.

Yes.

LISA

Why don't we stipulate the date goes  
well and just move to the key  
variable? \*

LEONARD

You mean kiss you now?

LISA

Yes.

LEONARD

Can you define the parameters of the  
kiss?

LISA

Close-mouthed but romantic. Mint? \*

LEONARD

Thank you.

THEY BOTH TAKE MINTS, AWKWARDLY POSITION THEMSELVES AND KISS.

LISA

What do you think?

LEONARD

You proposed the experiment. I think  
you should present your findings  
first.

18.  
(I/B)

LISA

Fair enough. On the plus side, a good  
kiss, reasonable technique and a very  
nice match on height. On the other  
hand, no arousal.

LEONARD

None?

LISA

None.

LEONARD

Ah. Well, thank you for your time.

LISA

Thank you.

LEONARD SIGHS AND CROSSES TO HIS DESK, A FEW FEET AWAY FROM  
WHERE SHE'S WORKING. THEN:

LEONARD

None at all?

SHE SHRUGS, AND WE:

DISSOLVE TO:

*WR*
